

## How to install Java Plugin on a PC

1. Blackboard relies heavily on the Java client installed with your Web browser. Cookies, Java, and scripts must be enabled for Blackboard to function properly. Blackboard requires the latest version of Sun JRE 7. The Java can be downloaded from <http://www.java.com/en/download/manual.jsp>.

2. Click on **Windows Offline**.

3. A screen will appear, click **Save File** and save to your Desktop.

4. Once the download is complete, open the downloaded file from your desktop.

5. Click **Install**.
6. If the download is successful, you will receive this message.
