

## Student Preview Mode

The official **Student Preview** mode allows instructors to view a course exactly as student would without having to login to a separate student account. Edit Mode is still available, but to see a true student view simply click the student preview icon  located in the same row as the **Change Course Theme** function.

With student preview, you can experience your course exactly as your students do. While in student preview mode, you can do the following student activities:

- Submit assignments
- Take tests
- Create blog and discussion posts
- Create journal and wiki entries
- View student tools, such as My Grades

## Enter Student Preview Mode

1. To enter student preview mode, click the  **Enter Student Preview** function, at the top-right corner of your course pages, next to the **Change Course Theme** function.

2. Student preview creates a student account, called the preview user account, logs you in as that student and enrolls you in the current course. When you enter student preview mode, the student preview bar appears at the top of every page. The bar displays the text "Student Preview mode is ON" and has **Settings** and **Exit Preview** functions.

## Exit and Delete Your Preview User Account

1. Click Exit Preview to exit the student preview. When you exit the student preview, you are prompted to keep or delete the preview user and all its associated data. It is considered best practice to remove the preview user and its associated data.

Here is a video on how to use the Student Preview mode:
