

Adaptive Release: Basic and Advanced

Adaptive Release allows you to control when material is released to students and which students are able to view it.

Adaptive Release: Basic

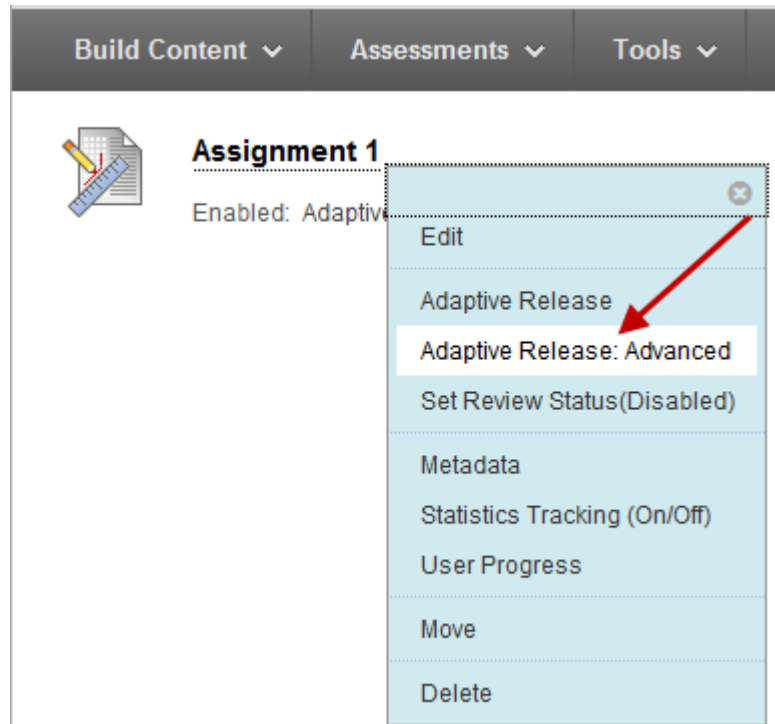

1. Locate the item, file, module, content folder, assignment, assessment or specific course material that you would like to add Adaptive Release criteria to.
2. From the drop-down menu beside the name, select **Adaptive Release**
3. On the Adaptive Release page you can choose to edit the **Date**, **Membership**, **Grade** and **Review Status** of the selected content.
4. To edit the **Date** criteria, input the Days After and/or Days Unit criteria
5. To edit the **Membership** criteria, enter specific usernames or choose pre-made groups
6. To edit the **Grade** criteria, choose a column to associate the content with
7. To edit the **Review Status** criteria, choose an item to mark as reviewed.
8. Choose **Submit**

Adaptive Release: Advanced

Using the Advanced Adaptive Release, you create a rule that contains specific criteria.

1. Locate the item, file, module, content folder, assignment, assessment or specific course material that you would like to add Adaptive Release criteria to.
2. From the drop-down menu beside the name, select **Adaptive Release: Advanced**
3. Choose **Create Rule**
4. On the Create Rule page, input a name and choose Submit.
5. On the Manage Criteria page for the rule, choose **Create Criteria** and select **Date, Membership** or **Grade**.
6. Input the applicable criteria that you wish to be in the rule.
7. Click the check box for the rule to select it for the specific content.
8. Click **Submit**.
