Edit Mode On/Off

When working as an **Instructor or Section Designer** in Blackboard 9.1, there are 2 different modes: the **ON** mode and the **OFF** mode.

The On/Off modes can be accessed by the **ON/OFF** button.

Editing can only be made to a course site when the edit mode is turned **ON**.

If the edit mode if turned **OFF** edits cannot be made to the course site. When the edit mode is **OFF**, instructors and section designers can view the site as a student would.
